

WHERE HEALTH & SAFETY COME TOGETHER

1

THE COMFORT-FIT SYSTEM

A combination of three integral components, has been fluidly designed to ensure exceptional comfort. The last, footbed and shank are all perfectly aligned and make up the V12 tri-comfort system.

REMOVABLE COMFORT INSOLE

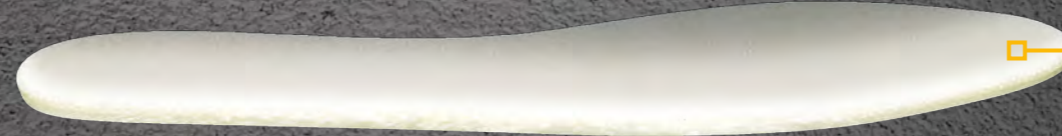

Our comfort insoles cushion and cradle the foot. Removable Dynamic Arch™ insoles allow you to tailor your boot to the shape and arch of your foot, in order to provide the best possible support and comfort.

ANTI-TWIST SHANK

Allowing the boot to flex naturally and in harmony with the foot, the anti-twist shank reduces fatigue caused by lateral twisting.

THE LAST SHAPE

Hand crafted in Britain, our last is the basis for all IGS and STS footwear, and was made by combining the data created from scans of over 4,000 feet.

2

A SAFE DESIGN

Expert designs and tested technologies are used in every element of a V12 boot. We build from the ground up to ensure maximum durability, comfort and safety.

QUALITY LEATHER OR TECHNICAL MATERIAL UPPER ENSURING SUPERIOR WEAR

COMPOSITE TOECAP FOR LIGHTWEIGHT STRENGTH

PROTECTIVE MIDSOLE FOR PENETRATION PROTECTION

SHOCK-ABSORBING HEEL

CUSHIONED MIDLAYER FOR SHOCK ABSORBING

SLIP RESISTANT DURABLE SOLES
